

DAIRY RANGE

Leadfeed  Pellets

Leadfeed with Bio-Chlor is a nutritionally balanced ration, designed to reduce metabolic disease, improve body condition and assist with successful adaption to high grain diets, resulting in higher lactation production and reproductive performance.

### Features

### Benefits

Nutritionally balanced ration	> Meets the demands of springer cows to help prevent the problems associated with calving
High energy density ration	> To prepare the cow for calving and help prevent ketosis
Contains Bio-Chlor®	> To increase microbial protein production , resulting in improved appetite and rumen function
Quality assured vitamin/trace mineral premix	> Provides the essential vitamins and minerals to meet nutritional needs
Anionic salts	> Alters the electrolyte balance to help prevent milk fever and retain placenta
Calcium reduced	> Mobilises bone calcium to prevent milk fever
Contains canolameal	> Improves amino acid profile
Pellet feeding prior to calving	> Improves grain adaptation and maximises production levels in subsequent lactation
Flavour enhancers added	> Improves palatability
Raw material standards	> High quality and safety of ingredients for quality assurance

### NUTRITIONAL ANALYSIS

Nutrients	Dry matter basis
Crude Protein (min)	18.0%
Metabolisable Energy (est)	11.0 MJ/kg
Added Salt (max)	0.1%
Calcium (min)	0.5%
Phosphorus (min)	0.4%
Monensin	80ppm

### INGREDIENT SELECTION

Cereal grains, cereal byproducts, Bio-Chlor®, magnesium sulphate, vitamin/trace mineral premix, Rumensin 100®.

### FEEDING DIRECTIONS

Leadfeed with Bio-Chlor is a specialised pellet designed to be fed to springer cows three weeks prior to calving.

Gradually increase intake of Leadfeed with Bio-Chlor from 1 to 3 kg/day over this period.

Leadfeed with Bio-Chlor should be fed with hay. Avoid grazing pastures with high potassium content.
