MILNE FEEDS DIET ANALYSIS REQUEST

MICROSTEED is a nutritional analysis computer program. By analysing the ingredients of your horses feed and taking into account such things as age, workload, horse type and body condition it can help you design a feed program that fits all of your horses daily requirements. Your current diet can be analysed and then modified to ensure that the horse receives the correct balance of nutrients for his needs. It is important that when completing this form to give as much accurate and up to date information as possible. If you have the correct data, the results of the analysis will be more accurate.

FOR YOUR FREE DIET ANALYSIS USING THE MICROSTEED PROGRAM SIMPLY FILL IN THE FOLLOWING INFORMATION AND FAX OR MAIL TO THE ABOVE NUMBER OR ADDRESS

SECTION ONE - CONTACT DETAILS

Rider Name: _____ Phone: _____ Fax: _____
 Postal Address: _____ Post Code: _____
 Email: _____
