Food for horses that fly

**Pegasus Sweetmax™ is a premium, oat-free, muesli 'sweet' feed designed to meet the nutritional demands of peak performance, race and sport horses.**

#### NUTRITIONAL ANALYSIS

Nutrients	As fed basis
Digestible Energy (min)	14.0 MJ/kg
Crude Protein (min)	15.0%
Lysine	0.7%
Crude Fibre (max)	11.0%
Added Salt (max)	1.0%
Crude Fat (min)	8.0%
Calcium (min)	0.9%
Phosphorus (min)	0.55%
Magnesium	0.34%
Zinc	130 mg/kg
Iron	260 mg/kg
Manganese	125 mg/kg
Copper	45 mg/kg
Selenium	0.8 mg/kg
Iodine	0.5 mg/kg
Cobalt	0.3 mg/kg
Vitamin A	12000 IU/kg
Vitamin D3	1050 IU/kg
Vitamin E	350 IU/kg
Vitamin K3	5 mg/kg
Vitamin B1	11 mg/kg
Vitamin B2	12 mg/kg
Vitamin B3	80 mg/kg
Vitamin B5	24 mg/kg
Vitamin B6	7 mg/kg
Vitamin B9	5 mg/kg
Vitamin B12	35 µg/kg
Biotin	0.2 mg/kg

#### Features and Benefits

A highly palatable feed that will tempt the pickiest of eaters

Provides all the essential nutrients, vitamins and minerals for optimal health and fitness of equine athletes

Concentrated formula allows you the flexibility to add your own grains or Sweetmax™ can be used as the sole concentrate

Contains EquiJewel® which provides an added source of fat-based cool energy

High quality protein and amino acid balance to build and repair muscle tissue

Contains high levels of the antioxidants Vitamin E and selenium for enhanced immune function and muscle recovery

High in B group vitamins to improve appetite, energy utilisation and red blood cell synthesis

Contains live yeast culture to enhance digestion and mineral absorption

Contains organic chromium to improve glucose metabolism, decrease lactic acid accumulation and reduce the severity of tying up

Contains added electrolytes to replace sweat losses

Premium blend of quality grains and ingredients used to maximise finished feed quality and palatability

Complete range of vitamins and minerals contained in a pellet to reduces waste of powdered minerals and vitamins and ensure no sifting out.

#### FEEDING DIRECTIONS

Sweetmax™ should be fed in conjunction with a minimum of 1% body weight of good quality roughage in the form of pasture, hay or chaff.

Sweetmax™ should be introduced slowly to the diet over 7 -10 days.

The amount fed should be divided into at least two feeds daily, with a maximum of 3kg of grain per feed.

Reduce the amount of Sweetmax™ fed on rest days.

Additional grain may be added depending on the horse's energy requirements.

Sweetmax™ can be used as the sole concentrate for 'good doing' horses or for horses needing an oat free diet.

Clean, fresh water should be available at all times.

#### Feeding recommendations (kg/day)

Bodyweight	400kg	500kg	600kg
Light work	1.5-3	2-4	2.5-5
Moderate work	2.5-5	3-6	3.5-7
Heavy work	3.5-6	4-7	4.5-8

The above table is a guide only and the amount fed should be adjusted according to the horse's age, temperament, condition, bodyweight and workload.

#### Example diet for a 500kg horse in moderate exercise
