

BEEF RANGE

# Cattle Cubes

Cattle Cubes are a fibre and grain based cube designed to be fed to live export cattle during transportation or whilst in holding yards. It is a high fibre and moderate protein ration for moderate growth.

## Features

## Benefits

<b>Fibre-based ration</b>	> Meets the nutritional requirements for moderate growth.
<b>Moderate protein level</b>	> Assists in weight gain
<b>Contains Rumensin 100</b>	> Modifies rumen bacteria, improves feed efficiency and reduces faecal shedding of coccidia
<b>High fibre</b>	> Reduces the risk of acidosis and maintains a healthy rumen
<b>Cubed feed</b>	> Reduces dust and wastage
<b>No ingredient separation</b>	> Even nutrient blend received by each animal
<b>Raw material receival standards</b>	> High quality and safety of ingredients for quality assurance

Rumensin is a registered trademarks of Elanco Animal Health (A division of Eli Lilly and Co USA)

## NUTRITIONAL ANALYSIS

Crude Protein (min)	12.0%
Metabolisable Energy (est)	10.0 MJ/kg
Added Salt (max)	NIL
Calcium (min)	1.0%
Phosphorus (min)	0.2%
Monensin	26ppm

## INGREDIENT SELECTION

Cereal straw, lupins, barley, wheat, triticale, lupins, oats, cereal byproducts, bentonite, lime, vitamin/trace mineral premix, Rumensin 100®.

## FEEDING DIRECTIONS

Export Cattle Cubes are a safe high fibre ration that can be fed to mature cattle without supplying additional roughage.

The expected feed intake will be about 2.5-3% of liveweight.

## INTRODUCTION

Provide cattle with unlimited access to good quality hay for two days before feeding Export Cattle Cubes.
