# Calfgro-S Pellets

Calfgro-S is a nutritionally balanced ration containing straw, that is designed to be fed to calves between the ages of 3 and 12 months.

Features	Benefits
Nutritionally balanced ration	> Meets the demands of growing calves
18% protein ration	> Optimum protein level for growth and development of calves greater than 12 weeks
Quality assured vitamin/trace mineral premix	> Provides the essential vitamins and minerals to meet nutritional demands of growth and to maintain calf health
Contains straw	> Fibre aids in the prevention of acidosis
Contains bentonite	> Buffers rumen pH and helps prevent acidosis
Contains Bovatec <sup>®</sup> 150 (lasalocid sodium)	> Improves feed conversion efficiency and aids in the prevention of coccidiosis
Molasses added	> Increases palatability and feed intake
Pelleted feed	> Reduces dust and prevents wastage
Raw material receival standards	> High quality and safety of ingredients
Least cost formulation	> Better value for your feed dollar

Bovatec is a registered trademark of Alpharma Inc. USA

## NUTRITIONAL ANALYSIS

Nutrients	Dry matter basis
Crude Protein (min)	18.0%
Metabolisable Energy (est)	11.0 MJ/kg
Crude Fibre (max)	15.6%
Added Salt (max)	0.50%
Calcium (min)	0.55%
Phosphorus (min)	0.30%
Lasalocid Sodium	37.0ppm

## INGREDIENT SELECTION

Lupins, barley, oats, wheat, triticale, cereal byproducts, cereal straw, limesand, dicalcium phosphate, molasses, salt, Bovatec<sup>®</sup> 150, bentonite, vitamin/trace mineral premix

## FEEDING DIRECTIONS

Calfgro-S is designed to be fed *ad lib* to calves between the ages of 3 and 12 months. It should be fed with hay or as a supplement to good quality pasture. It can be fed safely in a self-feeder.

Calfgro-S increases body weight in calves resulting in a heifer that is better prepared for first lactation or a quicker turnoff in beef calves.
