

DAIRY RANGE

# Calfgro Pellets

Calfgro is a nutritionally balanced high energy and protein pellet, designed to be fed to calves from 1 week of age until 10-12 weeks of age.

## Features

## Benefits

Nutritionally balanced ration	> Meets the demands of growing calves
High energy density ration	> Rapid growth and development
20% protein ration	> Optimum protein level for growth and development of calves less than 12 weeks of age
Quality assured vitamin/trace mineral premix	> Provides the essential vitamins and minerals to meet nutritional demands of growth and to maintain calf health
Promotes early rumen development	> Early weaning onto pasture
Contains bentonite	> Buffers rumen pH to help prevent acidosis
Contains Bovatec <sup>®</sup> 150 (lasalocid sodium)	> Improves feed conversion efficiency and aids in the prevention of coccidiosis
Pelleted feed	> Reduces dust and prevents wastage
No ingredient separation	> Even nutrient blend received by each calf
Raw material receival standards	> High quality and safety of ingredients
Least cost formulation	> Better value for your feed dollar

Bovatec is a registered trademark of Alpharma Inc. USA

## NUTRITIONAL ANALYSIS

Nutrients	Dry matter basis
Crude Protein (min)	20.0%
Metabolisable Energy (est)	12.5 MJ/kg
Crude Fibre (max)	15.6%
Calcium (min)	0.55%
Phosphorus (min)	0.30%
Lasalocid	50ppm

## INGREDIENT SELECTION

Lupins, barley, oats, wheat, triticale, cereal byproducts, cereal straw, limesand, dicalcium phosphate, molasses, salt, potassium chloride, sodium bentonite, vitamin/trace mineral premix, lasalocid sodium

## FEEDING DIRECTIONS

Calfgro is designed to be fed *ad lib* to calves between 1 week to 10-12 weeks of age. It should be fed with clean straw prior to weaning. Make sure pellets are always fresh to encourage intake.

Calfgro aids in the development of the rumen to enable earlier utilisation of pasture.
