

DAIRY RANGE

# Turbo Pellets

**Turbo is a nutritionally balanced high energy and high protein ration, designed to be fed to high producing dairy cows on low protein hay and silage.**

## Features

## Benefits

Nutritionally balanced ration	> Meets the demands of high producing dairy cows
High energy density ration	> Increased milk production and quality
28% protein ration	> To balance hay and silage of less than 10% crude protein
Quality assured vitamin/trace mineral premix	> Provides the essential vitamins and minerals to meet nutritional needs and improve reproductive performance
Molasses added	> Highly palatable
Pelleted feed	> Reduces dust and prevents wastage
No ingredient separation	> Even nutrient blend received by each cow
Raw material receival standards	> High quality and safety of ingredients for quality assurance
Least cost formulation	> Better value for your feed dollar
Optional additives - monensin, buffers, magnesium oxide, zinc bioplex, biotin, selenium	> To meet specific herd health requirements

## NUTRITIONAL ANALYSIS

Nutrients	Dry matter basis
Crude Protein (min)	28%
Metabolisable Energy (est)	13.0 MJ/kg
Added Salt (max)	1.0%
Calcium (min)	1.0%
Phosphorus (min)	0.50%

## INGREDIENT SELECTION

Lupins, barley, oats, wheat, cereal byproducts, limesand, dicalcium phosphate, molasses, urea, salt, potassium chloride, ammonium sulphate, vitamin/trace mineral premix.

## FEEDING DIRECTIONS

Turbo is designed to be fed to dairy cows in all stages of lactation, to supplement low quality roughage. It is the recommended feed when pasture quality and quantity are lacking, as energy is the first limiting factor to production.

Turbo can be fed in the bail or as part of a total mixed ration (TMR). The quantity of feed should be adjusted according to the cow's production and body condition.
