

EQUINE RANGE

# Pony Cubes

**Pony Cubes are a highly palatable, nutritionally balanced ration designed to be fed to ponies in conjunction with good quality roughage. Pony Cubes may also be suitable for animals that have a tendency to “heat up” on high grain diets.**

## Features

## Benefits

Nutritionally balanced ration	> Meets the protein, energy and mineral requirements of horses when combined with good quality roughage
Highly digestible energy sources	> Provides energy without heating effects
Quality assured vitamin/trace mineral premix	> Provides the essential vitamins and minerals to meet nutritional needs and maintain health
Molasses added	> Increases palatability for maximum feed acceptance
Cubed feed	> Easy to feed and the large pellet size is ideal for mature horses. Reduces dust and prevents wastage
No ingredient separation	> Even nutrient blend received by each horse
Raw material receival standards	> High quality and safety of ingredients

## NUTRITIONAL ANALYSIS

Nutrients	As fed basis
Crude Protein (min)	11.0%
Digestible Energy (min)	10.6 MJ/kg
Crude Fibre (max)	15.0%
Added Salt (max)	1.0%
Calcium (min)	1.0%
Phosphorus (min)	0.3%

## INGREDIENT SELECTION

Lupins, barley, oats, wheat, triticale, cereal byproducts, lucerne, cereal straw, molasses, salt, limesand, dicalcium phosphate, vitamin/trace mineral premix.

## FEEDING DIRECTIONS

Pony Cubes are a grain-based pellet and should be fed in conjunction with good quality roughage in the form of hay, chaff or pasture. Clean, fresh water should be available at all times.

### Feeding recommendations

<i>Exercise</i>	<i>Pellets/100kg BWT</i>
Not in work	0.40 kg
Light work	0.70 kg

The above table is a guide only and the amount fed should be adjusted according to the horse's age, temperament, condition, bodyweight and exercise. The amount fed should be divided into at least two feeds daily.

Pony Cubes should be introduced slowly into the diet over a period of at least one week.
