

Pegasus Equibalance™ is a premium concentrated pellet designed to balance grain, or as the sole feed for “good doers”.

NUTRITIONAL ANALYSIS

Nutrients	As fed basis
Digestible Energy (min)	13.5 MJ/kg
Crude Protein (min)	17.5%
Lysine	0.9%
Crude Fibre (max)	10.0%
Added Salt (max)	1.5%
Crude Fat (min)	8.0%
Calcium (min)	1.0%
Phosphorus (min)	0.5%
Magnesium	0.3%
Zinc	230 mg/kg
Iron	320 mg/kg
Manganese	190 mg/kg
Copper	85 mg/kg
Selenium	1.2 mg/kg
Iodine	1.0 mg/kg
Cobalt	0.5 mg/kg
Vitamin A	18000 IU/kg
Vitamin D3	2100 IU/kg
Vitamin E	400 IU/kg
Vitamin K3	11 mg/kg
Vitamin B1	17 mg/kg
Vitamin B2	23 mg/kg
Vitamin B6	9 mg/kg
Vitamin B12	70 µg/kg
Biotin	0.3 mg/kg
D-Calcium Pantothenate	37 mg/kg
Folic Acid	10 mg/kg
Niacin	104 mg/kg

INGREDIENTS

Triticale, wheat, barley, cereal byproducts, lupins, canola meal, soybean meal, molasses, vegetable oil, magnesium oxide, potassium chloride, limestone, salt, live yeast culture, organic chromium, mould inhibitor, vitamin E, KER vitamin/trace mineral premix, dicalcium phosphate.

Features and Benefits

Provides a balanced diet for performance horses when mixed with grains and roughage

Convenient source of all the essential nutrients, vitamins and minerals needed to balance grain for optimal health and fitness of equine athletes

Supplies highly digestible energy sources, including added fat, to maintain body condition and meet energy needs for peak performance

Can be used as the sole concentrate feed for an oats free diet to reduce the severity of tying up, to calm nervous horses or for good doing horses

High quality protein and amino acid balance to build and repair muscle tissue

Contains high levels of the antioxidants Vitamin E and selenium for enhanced immune function and muscle recovery

Contains live yeast culture to enhance digestion and mineral absorption

Contains organic chromium to improve glucose metabolism, decrease lactic acid accumulation and reduce the severity of tying up

Contains added electrolytes to replace sweat losses

Premium blend of quality grains and ingredients used to maximise finished feed quality and palatability

Pelleting improves energy utilisation from grains and reduces waste of powdered minerals and vitamins

FEEDING DIRECTIONS

Equibalance™ should be mixed 1 to 1 with grain such as oats or can be fed with other grains like steam flaked barley for nervous horses or horses prone to tying up

Equibalance can be fed as the sole feed for good doing horses

Feed a minimum of 1% body weight of good quality roughage in the form of pasture, hay or chaff

Equibalance™ should be introduced slowly to the diet over 7 - 10 days

The amount fed should be divided into at least two feeds daily, with a maximum of 3kg of Equibalance™ and grain per feed

Reduce the amount of Equibalance™ and grain fed on rest days

Supply a salt block to heavy sweating horses and extra electrolytes if required eg Equivit Restore

Clean, fresh water available at all times

Feeding recommendations (kg/day)

Bodyweight	400kg	500kg	600kg
Light work	1.5-2	2-2.5	2-3
Moderate work	2-2.5	2.5-3	3-3.5
Heavy work	2-3	3-3.5	3.5-4

The above table is a guide only and the amount fed should be adjusted according to the horse's age, temperament, condition, bodyweight and workload.

Example diet for a 500kg, 3 year old horse in moderate exercise
